WORK HISTORY

11/2025 to Current

Freelance Web Developer & Technical Consultant

Lead Layer – Long Beach, CA

- Acquired paying clients independently through cold outreach and relationship building, generating business without an established inbound pipeline.
- Managed the full project lifecycle, including discovery, requirements gathering, solution design, implementation, deployment, and ongoing support.
- Built and maintained websites for small businesses across multiple platforms, including custom HTML/CSS, WordPress, GoDaddy Website Builder, and CRM-based solutions using HighLevel.
- Implemented lead capture workflows, booking integrations, and automation tools to improve customer experience and reduce manual administrative work.
- Served as the primary point of contact for clients, translating technical concepts into clear recommendations and maintaining long-term relationships through responsive support.
- Balanced freelance client commitments alongside full-time agency responsibilities, demonstrating strong organization, prioritization, and self-management.

01/2021 to Current

Front End Developer

Growthmed – Playa Del Rey, CA

- Built and customized 50+ WordPress websites and child themes for healthcare clients, translating business requirements into production-ready solutions.
- Developed custom WordPress plugins to automate internal workflows, improve operational efficiency, and extend functionality beyond off-the-shelf solutions.
- Collaborated with designers, developers, content teams, and stakeholders to deliver projects on schedule while maintaining quality standards.
- Coordinated large-scale website initiatives involving multiple contributors, helping prioritize tasks, remove blockers, and keep projects moving toward completion.
- Performed ongoing maintenance, troubleshooting, and enhancements across active client websites, ensuring reliability and a positive user experience.
- Worked directly with content management systems, third-party integrations, and evolving client requirements in a fast-paced agency environment.
